

Private Pilot – Multi-engine VFR Training Package in a DA42

This program is for individuals that want to earn their Private Pilot Certificate in a Multi-engine airplane. A new pilot moving up to a twin-engine airplane is a big step in performance, knowledge and skill required. To facilitate multi-engine training at this initial level our package starts with soloing in a DA20 and then transitioning to the DA40 with G1000 avionics and soloing in that airplane. Some of the required flight Private Pilot Flight requirements will be flown in the DA40 CS G1000. With that work satisfactorily completed you will move into the DA42 for completion of the Private Pilot Course and your Practical flight exam.
